Question by the Economic Development Association: What issues in your platform will have a direct impact on our business as well as extended community?

My entire campaign revolves around the direct impact of business & citizens.

- It details my concerns of Governments restraints of individual freedoms.
- It touches on Government restrictions imposed on industry.
- I allude to American values, excessive, reckless spending.

I believe in Government of the people, by the people, for the people....

We the people formed Government to establish & maintain order in society, create security here & abroad and form a collective reasoning of standards for all to abide. But mostly to support & uphold our basic but essential Governing fundamentals laid out in our founding documents.

This is our legacy; not to be questioned, interpreted, disregarded but most of all not compromised.

I come to you to help make that difference; I'm ambitious, compassionate and have the drive to help us succeed.

We must understand that Government doesn't create wealth, jobs and/or opportunity. When Government intervenes, it only restricts and binds the hands of will. It can only take from the success that has been created by the people.

It's time to break the chains, support those who create wealth and opportunity, we can longer continue this path of self-destruction, help me help you begin the transformation at the local level....

Again, I bring to the table a perspective that looks at ideas & questions reason. Let's look a step further, get to the point and make that difference....
